ADHESIVE ANCHOR INSTALLER CERTIFICATION EXAM

Information for Exam Registrant

March 30-31, 2021

Lititz, PA

ADHESIVE ANCHOR INSTALLER

An Adhesive Anchor Installer is an individual who has demonstrated the ability to read, comprehend, and execute instructions to properly install adhesive anchors in concrete. The Adhesive Anchor Installer must also demonstrate possession of the knowledge to properly assess ambient conditions, concrete condition, materials, equipment, and tools for installing adhesive anchors and determine when it is appropriate to proceed with installation of an adhesive anchor or when additional guidance from a supervisor/foreman/project engineer is needed.

Parking at Rohrer's:

Please enter and park at the Rohrer's employees parking lot off of Erbs Quarry Road, just north of Lititz Road.

March 30-31, 2021

Rohrer's Incorporated
16 Lititz Road
Lititz, PA 17543

Certification Requirements

ACI will grant certification only to those applicants who obtain a passing grade on both the written examination and performance examinations.

1. The 90-minute written examination is closed-book and consists of 75 multiple-choice questions. To pass the written exam the examinee must attain a minimum score of 74%.
2. The performance examination consists of two parts, Part 1 (vertical down) and Part 2 (vertical up):
   - In Part 1, each examinee will be tasked with selecting, assembling, and using the proper tools, equipment and materials to drill and clean a vertical down hole in concrete, inject adhesive, and set an anchor to the proper depth and perpendicularity. The Examiner(s) will observe and evaluate the examinees' performance for proper procedure.
   - In Part 2, each examinee is required to inject clear tubes with adhesive in a vertical up orientation behind a blind to simulate a drilled hole in concrete using the piston plug method. The Examiner(s) will observe and evaluate the examinees' performance for proper procedure.

Following Part 1, the Examiner(s) will check the vertical down installation for proper depth and plumb; after the adhesive in the tubes injected in Part 2 has cured, the Examiner(s) will cross section them and evaluate the size and location of air voids to determine pass or fail. This program certifies candidates in the piston-plug method.

A set of instructions appropriate for the exam along with applicable Material Safety Data Sheets (MSDS) will be available for consultation by the examinee during both parts of the performance exam. Both parts of the performance must be successfully completed within one year or the entire performance examination must be re-taken.

Recertification is necessary every five years and requires successful completion of both the written and performance examinations.

More information on this exam is available at https://www.concrete.org/Portals/0/Files/PDF/cpp_6801-17.pdf.

Class Schedule

Day One:

7:30 AM	Arrive/check in
7:45 AM	Start review
10:00 AM	Break
10:15 AM	Continue review
12:00 PM	Lunch
12:30 PM	Q&A/Discussion
1:00 PM	Practice

Day Two:

7:30 AM	Arrive/check in
7:45 AM	Written exam
Following	Performance exam*

* The examinees will start their performance exam as they complete the written exam and will continue in that order until the stations are completed.

For the your safety, the safety of our instructors and the safety of others, masks and/or face shields will be required onsite.

Upon arrival, all will be required to have their temperatures checked and answer COVID-19 exposure questionnaires.

A COVID-19 waiver disclaimer was included in your registration process.

What To Bring

- Drivers license or photo ID (must be presented at the time you check in at the testing facility)
- ACI Adhesive Anchor Installer Workbook
- Two #2 pencils
- Proper personal protection equipment
- One simple function calculator (The use of programmable calculators during exams is prohibited)
- Notebook or note paper
- Cell phones/Smartphones must be turned off and not accessible for the duration of the exam

Attendee Policies

- We reserve the right to dismiss any registrant for disruptive behavior toward the instructor and/or other participants. Registrants dismissed for disruptive behavior are not eligible for a refund of their registration fee and will be reported to their employer.
- The registrant of this certification voluntarily assumes the risk of injury to themselves which may result from the training, testing or demonstration and releases and discharges PACA, the facility providing the training, testing or demonstration site and the provider of the training, testing or demonstration from all claims or liability by participant resulting therefrom.

Cancellation / Transfer Policies

- There will be a $300.00 fee charged for cancellations received 5 days or more prior to the exam date.
- No refunds for cancellation notices received less than 4 days prior to the exam date.
- No refunds will be honored for failure to attend an exam date for full certifications and retests.
- Substitutions are accepted within the same scheduled exam date.

Certification Policies / Information

Per the American Concrete Institute (ACI), certification is unique to the individual who participates in, and passes, both the written and performance exam - REGARDLESS OF WHO PAYS FOR THE EXAM.

The certification number assigned and certification card distributed belong SOLELY to the individual who presents their photo ID, upon their successful passing of both exams. A company or other individual may not claim this certification in any way.

To verify a certification, visit:

http://www.concrete.org/Certification/VerifyACertification.aspx?d=Ask

Answers to the following questions are available on ACI's website: http://www.concrete.org/Certification/CertificationFAQs.aspx

- Replacing a lost/damaged certification card
- What to do if a certification card has not been received
- Are you certified? - see link above
- Length of time it will take to receive exam results
- What to do if you fail either the written and/or the performance exam
- Information on your ID number
- Your certification expiration date

For more information, contact the American Concrete Institute at (248) 848-3790.
